

EXCALIBUR – consistent hybrid

EXCALIBUR is the most successful hybrid variety in the UK. It is suitable for planting in all regions and gives consistent performance. **Excalibur** shows good vigour in the autumn which aids establishment, especially under difficult conditions.

Excalibur is an early maturing variety that can help to spread the harvest workload and gives growers more cultivation time for first wheat entry. It is suitable for drilling in the normal OSR window or can be sown later if required.

Excalibur is a medium biomass hybrid that has an excellent pod shatter resistance rating as well as good Light Leaf Spot resistance. It also scores well for lodging resistance and stem stiffness making it easier to manage.

Excalibur – agronomics & disease resistance

Gross output	E&W 102%	North 102%
Oil content	E&W 44.9%	North 43.8%
Lodging resistance		7
Stem stiffness		7
Shortness of stem		7
Earliness of flowering		8
Earliness of maturity		6
Light Leaf Spot		6
Stem Canker		5
