

# FLASH – hybrid oilseed rape

**FLASH** is a late maturing hybrid variety with many advantages including good resistance to lodging, a late flowering season to avoid frosts and excellent powers of recovery in the spring.

**Flash** has consistently demonstrated a yield performance above current market standards and is one of the few varieties recommended for the whole of the UK. It also remains one of the highest yielding in the Northern region.

	North		East & West	
	Gross output	Oil content	Gross output	Oil content
<b>Flash</b>	105%	44.9%	102%	45.0%
<b>Excalibur</b>	102%	43.8%	102%	44.9%
<b>Lioness</b>	103%	46.4%	100%	46.5%
<b>NK Bravour</b>	98%	45.2%	99%	45.6%
