CERTIFICATE OF SEED PRODUCTION

TO WHOM IT MAY CONCERN:

For seeds designated to be planted in: United Kingdom

The seeds of the OILSEED RAPE lot number **F0076BP426242H** are seeds of variety **DK EXALTE**, registered in EU with erucic acid content below 1% per variety registration. They have been produced according to specifications developed to minimize the adventitious presence of impurities, including erucic acid impurities.

Monsanto S.A.S. certifies that Monsanto's OILSEED RAPE production methods are based on accepted industry standards for seed production and seed purity. Samples of the seed supplied in OILSEED RAPE lot number **F0076BP426242H** of variety **DK EXALTE** have been tested with gas chromatography in accordance with applicable national and international standards during production, to ensure production of quality seed, including the control of erucic acid inferior or equal to our internal standard of 0.5%.
