# LINSEED

## Late sowing option

United Oilseeds
THE LEADING BREAK CROP SPECIALIST

Low inputs and strong market demand make linseed a sound choice for farmers this spring particularly given the conditions to date. Suiting most soil types and not being related to any other break crop, means that it can easily slot into most rotations.

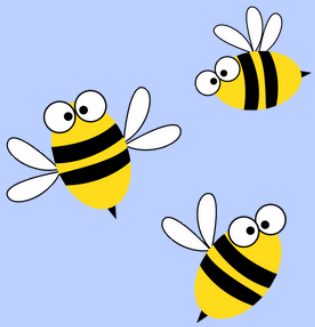

### United Oilseed Contract

Our linseed contracts are among the best available in the market. Based on produce of area, there are no penalties for under production. Harvest movement and a range of other options available. Ask your local Area Manager for contract pricing.

Penalty free produce of area contract

### Additional benefits of growing linseed this season

- Low input
- Sow into mid-May
- Good entry for 1st wheat
